

# KYNOCH FERTILIZER

## SAFETY DATA SHEET

### 3:2:1(22) + 0.25%Zn LQ

Date Issued / Revised Date : 25 September 2022  
New version : 3.0  
Date previously revised : 1 February 2021  
Replaced version : 2.0

Prepared according to: United Nations GHS (Rev 9E) (2021) and SANS 10234:2019  
(This Safety Data Sheet conforms to the requirements set by the Department of Agriculture, Land reform and Rural development of the Republic of South Africa on the 29 March 2022)

## SECTION 1: IDENTIFICATION

### 1.1 GHS<sup>1</sup> product identification

Product Name : **3:2:1(22) + 0.25%Zn LQ**

<sup>1</sup> GHS - Globally Harmonized System of Classification and Labelling of Chemicals

### 1.2 Other means of identification

Description : **Liquid blend**

CAS Number : **Mixture**

EC Number<sup>3</sup> : **Mixture**

<sup>2</sup> "CAS Number" - CAS Number is a numerical designation for chemicals that is maintained by the Chemical Abstracts Service (CAS) of the American Chemical Society.

<sup>3</sup> "EC Number" - The European Community number (EC number) is a unique identifier that was assigned to substances for regulatory purposes within the European Union by the European Commission.

### 1.3 Recommended use of materials and restrictions on use

Recommended use of material : **Intended to be used as a fertilizer and in fertilizer blends**

Description : **Source of plant nutrients**

Restrictions on use : **None Identified**

### 1.4 Supplier's details

Supplier's details : **1st Floor, ETG House  
62 Weirda Road East  
Sandton  
2196  
Tel no: (011) 317-2000**

### 1.5 Emergency phone number

Emergency phone number : **Dial Triple Zero (000) and ask for fire  
: Ambulance or the Fire department – 10177  
: Kynoch – 086 092 7272  
: Spilltech - 086 100 0366**

## SECTION 2: HAZARD IDENTIFICATION

### 2.1 Classification of substance or mixture

Product Defined : **Mixture**

#### Summarized Classification

| Types of Hazards      | Hazard Class                                           | Category/subcategory | H-Statement |
|-----------------------|--------------------------------------------------------|----------------------|-------------|
| Physical Hazards      | Corrosive to Metals                                    | Category 1           | H290        |
| Health Hazards        | Serious eye damage/eye irritation                      | Category 2A          | H319        |
|                       | Skin corrosion/irritation                              | Category 1           | H314        |
| Environmental Hazards | Hazardous to the aquatic environment, acute hazard     | Category 3           | H402        |
|                       | Hazardous to the aquatic environment, long-term hazard | Category 3           | H412        |

Classification according to the United Nations GHS (Rev 9E) (2021) and SANS 10234:2019

<sup>1</sup> "Not Classified" – Data conclusive but not at sufficient levels for classification.

<sup>2</sup> "H-Statement" – Hazard Statement. Full decryption in Section16

| Composition | Description        | CAS Number | Classification                                                                |
|-------------|--------------------|------------|-------------------------------------------------------------------------------|
| 0-10%       | Ammonium Nitrate   | 6484-52-2  | Oxid. Solid 3, Eye Damage 2A, Acute Tox. Oral Cat 5                           |
| 0-50%       | Urea               | 57-13-6    | Eye Irritation, Cat 2A                                                        |
| 0-10%       | Ammonia            | 7664-41-7  | Flam Gas2, Comp Gas, Acute tox inh 3, Skin Cor. 1B, Aqua short 1, Aqua Long 2 |
| 0-50%       | Phosphoric Acid    | 7664-38-2  | Cor. Metal 1, Acute Tox. Oral 4, Skin Cor. 1, Eye Damage 1                    |
| 0-50%       | Potassium Chloride | 7447-40-7  | No Classification                                                             |
| 0-5%        | Zinc Sulphate      | 7733-02-0  | Acute Tox Cat4, Eye Damage 1, Aqua Short Cat1, Aqua Long Cat1                 |
| 20-50%      | Water              |            | No Classification                                                             |

### 2.2 GHS Label elements, including precautionary statements

Pictogram :

Pictogram Name : **Exclamation**

Signal Word : **Danger**

Hazard Statements :

- H290** - **May be corrosive to metals**
- H319** - **Causes serious eye irritation**
- H314** - **Causes severe skin burns and eye damage**
- H402** - **Harmful to aquatic life**

|                          |      |                                                                                                    |
|--------------------------|------|----------------------------------------------------------------------------------------------------|
| Precautionary Statements | H412 | - Harmful to aquatic life with long lasting effects                                                |
|                          | P234 | Keep only in original container.                                                                   |
|                          | P260 | Do not breathe dust/fume/gas/mist/vapors/spray.                                                    |
|                          | P264 | Wash hands [and ...] thoroughly after handling.                                                    |
|                          | P265 | - Do not touch eyes.                                                                               |
|                          | P280 | - Wear protective gloves/protective clothing/eye protection/face protection/hearing protection/... |
|                          | P273 | Avoid release to the environment.                                                                  |

### 2.3 Other hazards that do not result in classification

Hazards : **Not Specified**

Reference: (European Chemical Agency [ECHA], n.d.) & (Pubchem, search, n.d.)

## SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

### 3.1 Substance

Substance : **N/A**

<sup>1</sup> "N/A" – Not available

Reference: (European Chemical Agency [ECHA], n.d.) & (The Australian Industrial Chemicals Introduction Scheme [AICIS], n.d.)

### 3.2 Mixture

#### Substance A:

Common name : **Ammonium nitrate**  
 EC Name : **Ammonium nitrate**  
 Chemical Formula : **H<sub>3</sub>N.HNO<sub>3</sub> / NH<sub>4</sub>NO<sub>3</sub>**  
 Molecular Weight : **80 g/mol**  
 Nutrient Content : **35% Total Nitrogen (N), 17.5% Ammonium (NH<sub>4</sub>), 17.5% Nitrate (NO<sub>3</sub>)**  
 CAS Number : **6484-52-2**  
 EC Number : **229-347-8**

#### Substance B:

Common name : **Urea Granular**  
 EC Name : **Carbamide**  
 Chemical Formula : **CH<sub>4</sub>N<sub>2</sub>O**  
 Molecular Weight : **60,05 g/mol**  
 Nutrient Content : **46% N**  
 CAS Number : **57-13-6**  
 EC Number : **200-315-5**

**Substance C:**

Common name : **Ammonia**  
EC Name : **Ammonia, anhydrous**  
Chemical Formula : **H<sub>3</sub>N**  
Molecular Weight : **17.04 g/mol**  
Nutrient Content : **82% Total Nitrogen (N)**  
CAS Number : **7664-41-7**  
EC Number : **231-635-3**

**Substance D:**

Common name : **Phosphoric acid**  
EC Name : **Orthophosphoric acid**  
Chemical Formula : **H<sub>3</sub>O<sub>4</sub>P / H<sub>3</sub>PO<sub>4</sub>**  
Molecular Weight : **89 g/mol**  
Nutrient Content : **23% Phosphate (P)**  
CAS Number : **7664-38-2**  
EC Number : **231-633-2**  
Impurities and stabilizers : **N/A**

**Substance E:**

Common name : **Potassium Chloride Granules**  
EC Name : **Potassium Chloride**  
Chemical Formula : **KCl**  
Molecular Weight : **74.55 g/mol**  
Nutrient Content : **50% K**  
CAS Number : **7447-40-7**  
EC Number : **200-315-5**

**Substance F:**

Common name : **Zinc Sulphate**  
EC Name : **Zinc Sulphate**  
Chemical Formula : **H<sub>2</sub>O<sub>4</sub>S.Zn**  
Molecular Weight : **161,47 g/mol**  
Nutrient Content : **34% Zn**  
CAS Number : **7733-02-0**  
EC Number : **231-793-3**

## SECTION 4: FIRST AID MEASURES

### 4.1 Description of first aid measures

|                     |                                                                                                                                         |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| General information | : Not Specified.                                                                                                                        |
| After inhalation    | : If inhaled, remove to fresh air. Obtain medical attention if symptoms occur.                                                          |
| After skin contact  | : Rinse with plenty of running water. Remove contaminated clothing and shoes. Obtain medical attention if symptoms occur.               |
| After eye contact   | : Rinse with plenty of running water. Obtain medical attention if symptoms occur.                                                       |
| After swallowing    | : Rinse out mouth. Make victim drink water (maximum of 2 drinking glasses). Do NOT induce vomiting. If symptoms persist consult doctor. |

### 4.2 Most important symptoms and effects, both acute and delayed

|          |                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Effects  | : The substance is corrosive to the eyes, skin and respiratory tract. Corrosive on ingestion. Inhalation may cause asthma-like reactions (RADS). Exposure could cause asphyxiation due to swelling in the throat. Inhalation of high concentrations may cause lung oedema, but only after initial corrosive effects on the eyes and the upper respiratory tract have become manifest. Inhalation of high concentrations may cause pneumonitis. |
| Symptoms | : Inhalation - Cough. Sore throat. Burning sensation. Shortness of breath. Laboured breathing.<br>: Ingestion - Burns in mouth and throat. Burning sensation behind the breastbone. Abdominal pain. Vomiting. Shock or collapse.<br>: Skin contact - Redness. Pain. Blisters. Serious skin burns.<br>: Eye contact - Redness. Pain. Severe burns.                                                                                              |

### 4.3 Indication of any immediate medical attention and special treatment needed

No further relevant information available

## SECTION 5: FIRE-FIGHTING MEASURES

### 5.1 Suitable extinguishing medium

|                                   |                                                                           |
|-----------------------------------|---------------------------------------------------------------------------|
| Suitable extinguishing agents     | : Put out the fire using appropriate agents against the surrounding fire. |
| Inappropriate extinguishing media | : None                                                                    |
| Notes                             | : Use fire extinguishing methods suitable to surrounding conditions.      |

### 5.2 Specific hazards arise from chemical

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Warning | : The substance is a medium strong acid. Reacts violently with bases. The substance violently polymerizes under the influence of azo compounds and epoxides. On combustion, forms toxic fumes of phosphorus oxides. Decomposes on contact with alcohols, aldehydes, cyanides, ketones, phenols, esters, sulphides or halogenated organics. This produces toxic fumes. Attacks many metals. This produces flammable/explosive gas (hydrogen - see ICSC 0001). |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|                               |                                                         |
|-------------------------------|---------------------------------------------------------|
| Hazardous Combustion Products | : Hydrogen gas is released in contact with most metals. |
| Fire hazard                   | : Non-flammable substance                               |
| Explosion hazard              | : Not applicable                                        |
| Reactivity                    | : None                                                  |

### 5.3 Special protective action for Fire-Fighters

|                                                |                                                                                                                                                                                        |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.                                                                             |
|                                                | : No action shall be taken involving any personal risk or without suitable training.                                                                                                   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.                  |
|                                                | : Clothing for fire-fighters (including helmets, protective boots, and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

## SECTION 6: ACCIDENTAL RELEASE MEASURES

### 6.1 Personal precautions, protective equipment, and emergency procedures

|             |                                                                                                                                                                    |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Percussions | : No action shall be taken involving any personal risk or without suitable training.                                                                               |
| Equipment   | : Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.                                                    |
| Procedure   | : Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Provide adequate ventilation. |

<sup>1</sup> PPE – Personal precautions, protective equipment.

### 6.2 Environmental precautions

|               |                                                                                                                        |
|---------------|------------------------------------------------------------------------------------------------------------------------|
| Environmental | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.                    |
|               | : Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil, or air). |
|               | : Discharge into the environment must be avoided.                                                                      |

### 6.3 Methods and material for containment and cleaning up

|             |                                                                                                                                                                                                                                                                                                                         |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Small Spill | : Ventilate area and wash spill site after material pickup is complete. Throw sand, ashes or powder cement to absorb the liquid. Neutralise with slaked lime (calcium hydroxide), sodium carbonate, calcium carbonate or sodium bicarbonate. Place in container for disposal according to local / national regulations. |
| Large Spill | : Ventilate area and wash spill site after material pickup is complete. Throw sand, ashes or powder cement to absorb the liquid. Neutralise with slaked lime (calcium hydroxide), sodium carbonate, calcium carbonate or sodium bicarbonate. Place in container for disposal according to local / national regulations. |

|------------|-------------------------------------------------|
| Section 7  | : Information on safe handling.                 |
| Section 8  | : Information on personal protection equipment. |
| Section 13 | : For disposal information.                     |

## SECTION 7: HANDLING AND STORAGE

### 7.1 Precautions for safe handling

|          |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Handling | : Wash hands after use. Do not mix with bases. Do not eat, drink, smoke or use personal product when handling chemical substances. Prevent contact with eyes, skin or clothes. Use with adequate ventilation. Local exhaust ventilation should be provided.<br><br>Avoid possible sources of ignition (spark or flame). Avoid contamination by any source including metals, dust and organic materials.<br><br>: For precautions see section 2.2. |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### 7.2 Conditions for safe storage, including any incompatibilities

|                             |                                                                                                                                                                                                                                         |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Storerooms and receptacles  | : Not Specified                                                                                                                                                                                                                         |
| One common storage facility | : Dry. Well closed. Ventilation along the floor.<br><br>: Separated from food and feedstuffs and incompatible materials. See Chemical Dangers.<br><br>: Incompatible material: Stainless steel 316-L. High-density polyethylene. Glass. |
| Handling of product         | : Store in cool, dry, clean, well, ventilate areas away from alkalini products and metals. Do not store under direct sun light. Do not pile up the containers. Do not store at temperatures close to freezing point.                    |
| Room conditions             | : Dry. Well closed. Ventilation along the floor.                                                                                                                                                                                        |
| Storage Class               | : (TRGS 510): 10 - 13 Other liquids and solids: Non-Combustible Solids                                                                                                                                                                  |

### 7.3 Specific end use(s)

|                     |                                                                                      |
|---------------------|--------------------------------------------------------------------------------------|
| Specific end use(s) | : Apart from the uses mentioned in section 1.3 no other specific uses are stipulated |
|---------------------|--------------------------------------------------------------------------------------|

## SECTION 8: EXPOSURE CONTROL AND PERSONNEL PROTECTION

### 8.1 Control Parameters

|      | Compound           | Cas Number |  | TWA <sup>1</sup>           | STEL <sup>2</sup>           |
|------|--------------------|------------|--|----------------------------|-----------------------------|
| OCHA | Ammonium Nitrate   | 6484-52-2  |  | Not Listed                 | Not Listed                  |
|      | Urea               | 57-13-6    |  | 10 g/m <sup>3</sup>        | Not Listed                  |
|      | Ammonia, anhydrous | 7664-41-7  |  | 17mg/m <sup>3</sup> 25 ppm | 24 mg/m <sup>3</sup> 35 ppm |
|      | Phosphoric Acid    | 7664-38-2  |  | 8 mg/m <sup>3</sup>        | 15 mg/m <sup>3</sup>        |
|      | Potassium Chloride | 7447-40-7  |  | Not Listed                 | Not Listed                  |
|      | Zinc Sulphate      | 7733-02-0  |  | Not Listed                 | Not Listed                  |
|      | Water              |            |  | Not Listed                 | Not Listed                  |

<sup>1</sup> TWA – Long term exposure: Time Weighted Average (8-hour period)

<sup>2</sup> STEL – Short term exposure: Short term exposure limit (15 min period)

Reference: (South African Labour Department, 2021) & (ILO, n.d.) & (OSHA, n.d.)

- Routes of exposure : **Serious local effects by all routes of exposure.**
- Inhalation risk : **A harmful contamination of the air will not or will only very slowly be reached on evaporation of this substance at 20°C.**
- Effects of short-term exposure : **The substance is corrosive to the eyes, skin and respiratory tract. Corrosive on ingestion. Inhalation may cause asthma-like reactions (RADS). Exposure could cause asphyxiation due to swelling in the throat. Inhalation of high concentrations may cause lung oedema, but only after initial corrosive effects on the eyes and the upper respiratory tract have become manifest. Inhalation of high concentrations may cause pneumonitis.**
- Effects of long-term or repeated exposure : **The substance may have effects on the upper respiratory tract and lungs. This may result in chronic inflammation and reduced lung function . Mists of this strong inorganic acid are carcinogenic to humans.**

Reference: (ILO, n.d.)

### 8.2 Appropriate engineering controls

- : **Ensure adequate ventilation, especially in confined areas. Ensure that eyewash stations, and safety showers are close to the workstation location. See Section 7.**

### 8.2 Individual protection measures

- Eye/face protection : **Wear safety glasses.**  
Use equipment for eye protection tested and approved under appropriate government standards. SABS adoption: SANS 50166:2018(SA), EN 166(EU) or NIOSH (US).
- Skin Protection : **Handle with gloves.**  
Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

- Body Protection : Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.
- Respiratory protection : **Not required under normal conditions of use.**  
Where protection from nuisance levels of dusts is desired, use type N95 (US) or type P1 (EN 143) dust masks. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
- Control of environmental exposure : **No special environmental precautions required**

## SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

### 9.1 Properties

|                                                          |                                   |
|----------------------------------------------------------|-----------------------------------|
| Physical state                                           | : <b>Solid</b> <sup>1</sup>       |
| Composition                                              | : <b>Mixture</b> <sup>2</sup>     |
| Colour                                                   | : <b>Colourless</b>               |
| Odour                                                    | : <b>Odourless</b>                |
| Melting point/freezing point                             | : <b>170°C</b>                    |
| Boiling point or initial boiling point and boiling range | : <b>Decomposes</b>               |

| Bulk Density (Volumetric)                                | : <b>N/A</b>                      |
| Particle characteristics                                 | : <b>N/A</b>                      |

Molecular Formula : N/A

Molecular Weight : N/A

<sup>1</sup> "Solid" – Is a substance that cannot be classified as a liquid or Gas.

<sup>2</sup> "Substance" – Is chemical elements and their compounds in their natural state or obtained by production process)

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

## SECTION 10: STABILITY AND REACTIVITY

- Reactivity : Exothermic reaction with water. Reacts violently with strong alkalis. In contact with reactive metals (as steel to carbon & aluminium) may produce hydrogen. At high temperature formation of phosphorous oxides.
- Chemical stability : Stable under normal conditions
- Hazardous Reactions : The substance is a medium strong acid. Reacts violently with bases. The substance violently polymerizes under the influence of azo compounds and epoxides. On combustion, forms toxic fumes of phosphorus oxides. Decomposes on contact with alcohols, aldehydes, cyanides, ketones, phenols, esters, sulphides or halogenated organics. This produces toxic fumes. Attacks many metals. This produces flammable/explosive gas (hydrogen - see ICSC 0001).
- Conditions to Avoid : High and low temperature.
- Incompatible Materials : Incompatible material: Bases, metals, Stainless steel 316-L. High-density polyethylene. Glass.
- Hazardous Decomposition Products : Hydrogen gas is released in contact with most metals.

## SECTION 11: TOXICOLOGY

### 11.1 Acute Toxicity

- Classification : No Classification
- Description : Some substances are classified for Acute toxicity. The concentration of the hazardous substance is too low for classification.

#### Substance A:

| Method     | Compound         | Cas Number | Measure           | Value                       | Subject |
|------------|------------------|------------|-------------------|-----------------------------|---------|
| Oral       | Ammonium Nitrate | 6484-52-2  | LD50 <sup>1</sup> | 2950 mg/kg bw               | Rat     |
| Inhalation | Ammonium Nitrate | 6484-52-2  | LC50              | >88.8 mg/L <sup>2</sup>     | Rat     |
| Dermal     | Ammonium Nitrate | 6484-52-2  | LD50              | >5000 mg/kg bw <sup>2</sup> | Rat     |

#### Substance B:

| Method     | Compound                                                                                                                                                                                                | Cas Number | LD50         | Subject |
|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|--------------|---------|
| Oral       | Urea                                                                                                                                                                                                    | 57-13-6    | 14.3-15 g/kg | Rat     |
|            |                                                                                                                                                                                                         |            | 11.5-13 g/kg | Mouse   |
| Dermal     | No data are available. Urea is demonstrated to be of very low acute toxicity by the oral, subcutaneous and intravenous routes in the rat and mouse. Testing for acute dermal toxicity is not justified. |            |              |         |
| Inhalation | No data are available. The substance is a non-volatile solid and is produced as crystals with a particle size of >100 µm. There is therefore no potential for inhalation exposure.                      |            |              |         |

|              |      |         |               |       |
|--------------|------|---------|---------------|-------|
| Subcutaneous | Urea | 57-13-6 | 8.2-9.4 g/kg  | Rat   |
|              |      |         | 9.2-10.7 g/kg | Mouse |
| Intravenous  | Urea | 57-13-6 | 5.3-5.4 g/kg  | Rat   |
|              |      |         | 4.6-5.2 g/kg  | Mouse |

#### Substance C:

| Method     | Compound           | Cas Number | Measure           | Value                      | Subject |
|------------|--------------------|------------|-------------------|----------------------------|---------|
| Oral       | Ammonia, anhydrous | 7664-41-7  | LD50 <sup>1</sup> | 350 mg/kg bw               | Rat     |
| Inhalation | Ammonia, anhydrous | 7664-41-7  | LC50              | 9850 mg/m <sup>3</sup> air | Rat     |
| Dermal     | Ammonia, anhydrous | No Data    |                   |                            |         |

#### Substance D:

| Method     | Compound        | Cas Number | Measure           | Value                       | Subject    |
|------------|-----------------|------------|-------------------|-----------------------------|------------|
| Oral       | Phosphoric Acid | 7664-38-2  | LD50 <sup>1</sup> | 2600 mg/kg bw <sup>2</sup>  | Rat        |
| Inhalation | Phosphoric Acid | 7664-38-2  | LC50              | 3846 mg/m <sup>3</sup>      | Rat        |
|            |                 |            | LC50              | 856 mg/m <sup>3</sup>       | Mouse      |
|            |                 |            | LC50              | 5337 mg/m <sup>3</sup>      | Rabbit     |
|            |                 |            | LC50              | 193 mg/m <sup>3</sup>       | Guinea pig |
| Dermal     | Phosphoric Acid | 7664-38-2  | LD50              | >2000 mg/kg bw <sup>2</sup> | Rat        |

#### Substance E:

| Method       | Compound                                                                                                                                                                                                              | Cas Number | LD50          | Subject    |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|---------------|------------|
| Oral         | Potassium chloride                                                                                                                                                                                                    | 7447-40-7  | 2600 mg/kg    | Rat        |
|              |                                                                                                                                                                                                                       |            | 1500 mg/kg    | Mouse      |
| Dermal       | No data are available. Potassium chloride is demonstrated to be of very low acute toxicity by the oral, subcutaneous and intravenous routes in the rat and mouse. Testing for acute dermal toxicity is not justified. |            |               |            |
| Inhalation   | No data are available. The substance is a non-volatile solid and is produced as crystals with a particle size of >100 µm. There is therefore no potential for inhalation exposure.                                    |            |               |            |
| Subcutaneous | Potassium chloride                                                                                                                                                                                                    | 7447-40-7  | 2550 mg/kg    | Guinea pig |
|              |                                                                                                                                                                                                                       |            | 9.2-10.7 g/kg | Mouse      |
| Intravenous  | Potassium chloride                                                                                                                                                                                                    | 7447-40-7  | 142 mg/kg     | Rat        |
|              |                                                                                                                                                                                                                       |            | 117 mg/kg     | Mouse      |

#### Substance F:

| Method     | Compound      | Cas Number | Measure           | Value          | Subject |
|------------|---------------|------------|-------------------|----------------|---------|
| Oral       | Zinc Sulphate | 7733-02-0  | LD50 <sup>1</sup> | 926 mg/kg bw   | Rat     |
| Inhalation | Zinc Sulphate | 7733-02-0  | No effect         |                | Dog     |
| Dermal     | Zinc Sulphate | 7733-02-0  | LD50              | >2000 mg/kg bw | Rat     |

<sup>1</sup> "LD50" – Lethal Doses. The dosage at which 50% mortality was observed.

<sup>2</sup> "bw" - body-weight/day

## 11.2 Skin corrosion/irritation

|                |                                                                                                                                              |                   |
|----------------|----------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| Classification | : <b>Skin corrosion/irritation</b>                                                                                                           | <b>Category 1</b> |
| Description    | : <b>Some substances are classified. The concentration of the hazardous substance is high enough for the total mixture to be classified.</b> |                   |
| Subjects       | : <b>Humans, Rabbits</b>                                                                                                                     |                   |

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

## 11.3 Serious eye damage/irritation

|                |                                                                                                                                              |                    |
|----------------|----------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| Classification | : <b>Serious eye damage/eye irritation</b>                                                                                                   | <b>Category 2A</b> |
| Description    | : <b>Some substances are classified. The concentration of the hazardous substance is high enough for the total mixture to be classified.</b> |                    |
| Subjects       | : <b>Rabbits</b>                                                                                                                             |                    |

Reference: (ECHA, n.d.) & (EPA. New Zealand Government, n.d.) & (Pubchem, search, n.d.)

## 11.4 Respiratory or skin sensitisation

|                |                                                                           |  |
|----------------|---------------------------------------------------------------------------|--|
| Classification | : <b>No classification</b>                                                |  |
| Description    | : <b>None of the component was classified as skin corrosive/irritant.</b> |  |

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

## 11.5 Germ cell mutagenicity

|  |                                                                           |  |
|--|---------------------------------------------------------------------------|--|
|  | : <b>No classification</b>                                                |  |
|  | : <b>None of the component was classified as skin corrosive/irritant.</b> |  |

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

## 11.6 Carcinogenicity

|  |                                                                           |  |
|--|---------------------------------------------------------------------------|--|
|  | : <b>No classification</b>                                                |  |
|  | : <b>None of the component was classified as skin corrosive/irritant.</b> |  |
|  | : <b>Rat and Mouse</b>                                                    |  |

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

## 11.7 Reproductive toxicity

|                |                                                                          |  |
|----------------|--------------------------------------------------------------------------|--|
| Classification | : <b>Not Classified</b>                                                  |  |
| Description    | : <b>None of the component was classified for reproductive toxicity.</b> |  |
| Subject        | : <b>Rat</b>                                                             |  |

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

## 11.8 STOT<sup>2</sup> - single exposure

**No data available**

<sup>2</sup> "STOT" - Specific target organ toxicity.

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

## 11.9 STOT<sup>2</sup> - repeated exposure

No data available

<sup>2</sup> "STOT" - Specific target organ toxicity.

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

## 11.10 Aspiration hazard

No data available

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

## 11.11 Route of Exposure and potential effects

|               |   |                                                                                                                         |
|---------------|---|-------------------------------------------------------------------------------------------------------------------------|
| Swallowing    | : | <b>Burns in mouth and throat. Burning sensation behind the breastbone. Abdominal pain. Vomiting. Shock or collapse.</b> |
| Inhalation    | : | <b>Cough. Sore throat. Burning sensation. Shortness of breath. Laboured breathing.</b>                                  |
| Eye exposure  | : | <b>Redness. Pain. Severe burns.</b>                                                                                     |
| Skin exposure | : | <b>Redness. Pain. Blisters. Serious skin burns.</b>                                                                     |

## 11.12 Long- and short-term effects

No data available

Reference: (ECHA, n.d.)

# SECTION 12: ECOLOGICAL INFORMATION

## 12.1 Toxicity

Classification : **Hazardous to the aquatic environment, acute hazard Category 3**  
**Hazardous to the aquatic environment, long-term hazard Category 3**  
**Some substances are classified. The concentration of the hazardous substance is high enough for the total mixture to be classified.**

### Aquatic Toxicity Substance A:

| Compound         | Cas Number | Organism                        | Species                                             | Time | Measure           | Value      |
|------------------|------------|---------------------------------|-----------------------------------------------------|------|-------------------|------------|
| Ammonium Nitrate | 6484-52-2  | Fish                            | Carp                                                | 48-h | LC50 <sup>2</sup> | 447 mg/L   |
| Ammonium Nitrate | 6484-52-2  | Aquatic invertebrates           | Daphnia magna                                       | 48-h | EC50              | 490 mg/L   |
| Ammonium Nitrate | 6484-52-2  | Aquatic invertebrates           | Bullia digitalis                                    | 7D   | EC50 <sup>2</sup> | 555 mg/L   |
| Ammonium Nitrate | 6484-52-2  | Aquatic Algae and Cyanobacteria | Benthic Diatoms                                     | 10-d | EC50              | >1700 mg/L |
| Ammonium Nitrate | 6484-52-2  | Micro-organisms                 | Activated sludge of a predominantly domestic sewage | 3-h  | EC50 <sup>2</sup> | >1000 mg/L |

**Substance B:**

| Compound | Cas Number | Organism                        | Species            | Time | Measure           | Value        |
|----------|------------|---------------------------------|--------------------|------|-------------------|--------------|
| Urea     | 57-13-6    | Fish                            | Danio              | 96-h | LC50 <sup>1</sup> | 21 060 mg/L  |
| Urea     | 57-13-6    | Fish                            | Mozambique Tilapia | 28-d | EC10 <sup>3</sup> | 7 250 mg/L   |
| Urea     | 57-13-6    | Aquatic invertebrates           | Daphnia            | 24-h | EC50 <sup>1</sup> | >10 000 mg/L |
| Urea     | 57-13-6    | Aquatic invertebrates           | Daphnia            | 21-d | EC10 <sup>3</sup> | 141 mg/L     |
| Urea     | 57-13-6    | Aquatic Algae and Cyanobacteria | Green alga         | 92-h | EC50 <sup>1</sup> | 24 542 mg/L  |
|          |            |                                 |                    | 72-h | EC10 <sup>3</sup> | 6 896 mg/L   |
| Urea     | 57-13-6    | microorganisms                  | Pseudomonas putida | 72-h | EC50 <sup>1</sup> | >10 000 mg/L |

**Substance C:**

| Compound           | Cas Number | Organism                        | Species              | Time | Measure           | Value       |
|--------------------|------------|---------------------------------|----------------------|------|-------------------|-------------|
| Ammonia, anhydrous | 7664-41-7  | Fish                            | Fathead minnow       | 96-h | LC50 <sup>1</sup> | 34-109 mg/L |
| Ammonia, anhydrous | 7664-41-7  | Aquatic invertebrates           | Daphnia magna        | 48-h | LC50              | 101 mg/L    |
| Ammonia, anhydrous | 7664-41-7  | Aquatic Algae and Cyanobacteria | Chlorella vulgaris   | 18-d | EC50              | 2700 mg/L   |
| Ammonia, anhydrous | 7664-41-7  | Micro-organisms                 | Testing not relevant |      |                   |             |

**Substance D:**

| Compound        | Cas Number | Organism                        | Species                                             | Time | Measure           | Value      |
|-----------------|------------|---------------------------------|-----------------------------------------------------|------|-------------------|------------|
| Phosphoric Acid | 7664-38-2  | Fish                            | No data available                                   |      | <sup>1</sup>      |            |
| Phosphoric Acid | 7664-38-2  | Aquatic invertebrates           | Daphnia magna                                       | 48-h | EC50              | 100 mg/L   |
| Phosphoric Acid | 7664-38-2  | Aquatic Algae and Cyanobacteria | green alga                                          | 72-h | EC50 <sup>2</sup> | 100 mg/L   |
| Phosphoric Acid | 7664-38-2  | Micro-organisms                 | Activated sludge of a predominantly domestic sewage | 3-h  | EC50 <sup>2</sup> | >1000 mg/L |

**Substance E:**

| Compound | Cas Number | Organism                        | Species                 | Time | Measure           | Value     |
|----------|------------|---------------------------------|-------------------------|------|-------------------|-----------|
| KCl      | 7447-40-7  | Fish                            | Pimephales promelas     | 96-h | LC50 <sup>1</sup> | 880 mg/L  |
| KCl      | 7447-40-7  | Fish                            | Pimephales promelas     | 28-d | EC10 <sup>3</sup> | N/A       |
| KCl      | 7447-40-7  | Aquatic invertebrates           | Daphnia magna           | 24-h | EC50 <sup>1</sup> | 660 mg/L  |
| KCl      | 7447-40-7  | Aquatic invertebrates           | Daphnia magna           | 21-d | EC10 <sup>3</sup> | N/A       |
| KCl      | 7447-40-7  | Aquatic Algae and Cyanobacteria | Scenedesmus subspicatus | 72-h | EC10 <sup>3</sup> | 100 mg/L  |
| KCl      | 7447-40-7  | Microorganisms                  | -                       | 3-h  | EC50 <sup>1</sup> | 1000 mg/L |

**Substance F:**

| Compound      | Cas Number | Organism                        | Species                 | Time | Measure                        | Value      |
|---------------|------------|---------------------------------|-------------------------|------|--------------------------------|------------|

2

**Substance F:**

|               |           |                 |                     |    |      |            |
|---------------|-----------|-----------------|---------------------|----|------|------------|
| Zinc Sulphate | 7733-02-0 | Macro-organisms | Enchytraeus albidus | UN | NOEC | 35.7 mg/kg |
| Zinc Sulphate | 7733-02-0 | Arthropods      | Folsomia candida    | UN | NOEC | 14.6 mg/kg |
| Zinc Sulphate | 7733-02-0 | Plant           | Trifolium pratense  | UN | NOEC | 32 mg/kg   |
| Zinc Sulphate | 7733-02-0 | Micro organisms | UN                  | UN | NOEC | 14 mg/kg   |
| Zinc Sulphate | 7733-02-0 | Birds           | Not relevant        |    |      |            |

<sup>1</sup> "LC50 /EC50" - (Median Lethal Concentration/Median Effective Concentration) They are the concentrations at which 50% mortality or inhibition of a function (e.g., growth or growth rate) was observed.

<sup>2</sup> "NOEC" - No Observed Effect Concentration. NOEC is the highest tested concentration for which there are no statistically significant difference of effect when compared to the control group.

<sup>3</sup> "ECx" - It is the concentrations at which x % (10% for EC10) effect was observed or derived statistically when compared to the control group.

## 12.2 Persistence and degradability

|                |                                                                                                     |
|----------------|-----------------------------------------------------------------------------------------------------|
| Stability      | : <b>No data available</b>                                                                          |
| Biodegradation | <b>Readily biodegradation study does not need to be conducted since the substance is inorganic.</b> |

Reference: (ECHA, n.d.)

## 12.3 Bioaccumulate potential

|             |                                                                                                                                                                                 |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description | : <b>Simple inorganic salts with high aqueous solubility will exist in a dissociated form in an aqueous solution. Such a substance has a low potential for bioaccumulation.</b> |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Reference: (ECHA, n.d.)

## 12.4 Mobility in soil

|                |                            |
|----------------|----------------------------|
| Adsorption     | : <b>No data available</b> |
| Volatilization | : <b>No data available</b> |

Reference: (ECHA, n.d.)

## 12.5 Other adverse effects

|                |                            |
|----------------|----------------------------|
| Classification | : <b>No data available</b> |
|----------------|----------------------------|

# SECTION 13: DISPOSAL CONSIDERATIONS

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# SECTION 14: TRANSPORT INFORMATION

## 12.1 UN Modelled regulations

|                            |                                                                                       |
|----------------------------|---------------------------------------------------------------------------------------|
| UN Number                  | : <b>1805</b>                                                                         |
| UN proper shipping name    | : <b>Phosphoric acid solution</b>                                                     |
| Transport hazard class(es) | : <b>8 – Corrosive liquids</b>                                                        |
| Label                      | :  |
| Packing group              | : <b>III - Substances presenting low danger</b>                                       |
| Environmentally hazardous  | : <b>No classification</b>                                                            |

Special precautions: : **ADR/RID - Class C1 , HIS 80, Transport category 3**  
**IMDG - Special provision: 223**  
**IATA - Special provision: A3**

Transport in Bulk according to IMO instructions : **Not specified**

<sup>1</sup> ADR/RID - International Carriage of Dangerous Goods by Rail (RID) and by Road (ADR)

<sup>2</sup> IMDG - The International Maritime Dangerous Goods (IMDG)

<sup>3</sup> IATA - International Air Transport Association (IATA)

## SECTION 15: REGULATORY INFORMATION

### 15.1 Safety, Health, and environmental regulations specific for the substance or mixture

**Regulations** : **This Safety Data Sheet conforms to the requirements set by the Department of Agriculture, Land reform and Rural development of the Republic of South Africa, United Nations GHS (Rev 9E) (2021) and SANS 10234:2019, on the 29 March 2022.**

**Restrictions** : **The substance is not subjected to any prohibitions or restriction in South Africa.**

**Chemical Safety Assessment:** : **For this product a chemical safety assessment was not carried out.**

## SECTION 16: OTHER INFORMATION

### 16.1 Preparation and revision

#### Latest Version

Version Number : **Ver. 3**  
 Preparation Date : **25 August 2022**  
 Where the changes as made : **Complete overall of all data to comply with GHS regulations**

#### Previous Version

Version Number : **Ver. 2**  
 Preparation date : **February 2021**

### 16.2 Abbreviations and Acronyms

**GHS** : *Globally Harmonized System of Classification and Labelling of Chemicals*  
**ECHA** : *European Chemical agency*  
**AICIS** : *The Australian Industrial Chemicals Introduction Scheme*  
**EPA-NZ** : *Environmental protection agency New Zealand*  
**ILO (WHO)** : *International labour organization (World health organization)*  
**CAS Number** : *CAS Number is a numerical designation for chemicals that is maintained by the Chemical Abstracts Service (CAS) of the American Chemical Society.*  
**EC Number** : *The European Community number (EC number) is a unique identifier that was assigned to substances for regulatory purposes within the European Union by the European Commission.*  
**H-Statement** : *Hazard Statement*  
**P-Statement** : *Precautionary Statements*  
**Hazard Statements** : *H319 - Causes serious eye irritation*  
**Precautionary Statements** : *P264 - Wash hands [and ...] thoroughly after handling.*  
 : *P265 - Do not touch eyes.*  
 : *P280 - Wear protective gloves/protective clothing/eye protection/face protection/hearing*

|                |                                                                                                                                                                                                 |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                | : protection/...                                                                                                                                                                                |
| N/A            | : Not Applicable                                                                                                                                                                                |
| Not Classified | : Data conclusive but not at sufficient levels for classification                                                                                                                               |
| PPE            | : Personal precautions, protective equipment.                                                                                                                                                   |
| TWA            | : Time Weighted Average                                                                                                                                                                         |
| OEL            | : Occupational Exposure Limits                                                                                                                                                                  |
| STOT           | : Specific target organ toxicity                                                                                                                                                                |
| LC50 / EC50    | : (Median Lethal Concentration/Median Effective Concentration): They are the concentrations at which 50% mortality or inhibition of a function (e.g., growth or growth rate) was observed.      |
| NOEC           | : (No Observed Effect Concentration) NOEC is the highest tested concentration for which there are no statistically significant difference of effect when compared to the control group          |
| ECx            | : It is the concentrations at which x % (10% for EC10) effect was observed or derived statistically when compared to the control group                                                          |
| LD0            | : Lethal Dose 0, represents the dose at which no individuals are expected to die.                                                                                                               |
| LC0            | : Lethal concentration 0, represents the concentration at which no individuals are expected to die.                                                                                             |
| LDLo           | : Lethal dose low, is the lowest dosage of a compound that is introduced to the human body or that of an animal by any means apart from inhalation that will cause the death of the individual. |
