

KYNOCH FERTILIZER

SAFETY DATA SHEET

Fe 11 DTPA

Date Issued / Revised Date : 25 September 2022
New version : 3.0
Date previously revised : 1 February 2021
Replaced version : 2.0

Prepared according to: United Nations GHS (Rev 9E) (2021) and SANS 10234:2019
(This Safety Data Sheet conforms to the requirements set by the Department of Agriculture, Land reform and Rural development of the Republic of South Africa on the 29 March 2022)

SECTION 1: IDENTIFICATION

1.1 GHS¹ product identification

Product Name : **Fe 11 DTPA**

¹ GHS - Globally Harmonized System of Classification and Labelling of Chemicals

1.2 Other means of identification

Description : **Ferro/Iron DTPA**

Chemical name : **Sodium hydrogen [N,N-bis[2-[bis(carboxymethyl)amino]ethyl]glycinato(5-)]ferrate(2-)**

CAS Number² : **12389-75-2**

EC Number³ : **235-627-0**

² "CAS Number" - CAS Number is a numerical designation for chemicals that is maintained by the Chemical Abstracts Service (CAS) of the American Chemical Society.

³ "EC Number" - The European Community number (EC number) is a unique identifier that was assigned to substances for regulatory purposes within the European Union by the European Commission.

1.3 Recommended use of materials and restrictions on use

Recommended use of material : **Intended to be used as a fertilizer and in fertilizer blends**

Description : **Source of plant nutrients**

Restrictions on use : **None Identified**

1.4 Supplier's details

Supplier's details : **1st Floor, ETG House
62 Weirda Road East
Sandton
2196
Tel no: (011) 317-2000**

1.5 Emergency phone number

Emergency phone number : **Dial Triple Zero (000) and ask for fire
: Ambulance or the Fire department – 10177
: Spilltech - 086 100 0366**

Emergency phone number : Kynoch - 086 092 7272

SECTION 2: HAZARD IDENTIFICATION

2.1 Classification of substance or mixture

Product Defined : Substance

Summarized Classification

Types of Hazards	Hazard Class	Category/subcategory	H-Statement
Physical Hazards	Not Classified ¹		
Health Hazards	Not Classified		
Environmental Hazards	Not Classified		

Classification according to the United Nations GHS (Rev 9E) (2021) and SANS 10234:2019

¹ "Not Classified" – Data conclusive but not at sufficient levels for classification.

² "H-Statement" – Hazard Statement. Full decryption in Section 16

Classification by Organization

Organization	Substance	CAS Number	Classification
EPA-NZ	Fe 11 DTPA	12389-75-2	Not Listed
ECHA	Fe 11 DTPA	12389-75-2	No Classification
ILO (WHO)	Fe 11 DTPA	12389-75-2	Not Listed
AICIS	Fe 11 DTPA	12389-75-2	Not Listed

Reference: (European Chemical Agency [ECHA], n.d.) & (Environmental protection agency [EPA]. New Zealand Government, n.d.) & (The Australian Industrial Chemicals Introduction Scheme [AICIS], n.d.) & (International Labour organization [ILO], n.d.)

2.2 GHS Label elements, including precautionary statements

Pictogram : No Classification
Pictogram Name : No Classification
Signal Word : No Signal word.
Hazard Statements : N/A
Precautionary Statements : N/A

Reference: (Pubchem, GHS, n.d.)

2.3 Other hazards that do not result in classification

: This substance in certain solutions may be corrosive to metals; contact with water and aluminium should be avoided.

Reference: (European Chemical Agency [ECHA], n.d.) & (Pubchem, search, n.d.)

SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

3.1 Substance

Common name	: Fe DTPA
EC Name	: Sodium hydrogen [N,N-bis[2-[bis(carboxymethyl)amino]ethyl]glycinato(5-)]ferrate(2-)
Chemical Formula	: C14-H18-Fe-N3-O10.H.Na
Molecular Weight	: 447.18 g/mol
Nutrient Content	: 11% Iron (Fe)
CAS Number	: 12389-75-2
EC Number	: 235-627-0
Impurities and stabilizers	: N/A

¹ "N/A" – Not available

Reference: (European Chemical Agency [ECHA], n.d.) & (The Australian Industrial Chemicals Introduction Scheme [AICIS], n.d.)

3.2 Mixture

Mixture	: N/A
---------	-------

SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

General information	: In all cases of doubt, or when symptoms persist, seek medical attention.
After inhalation	: Dust may be irritating to the respiratory tract and cause symptoms of bronchitis. Move to fresh air. If symptoms persist, seek medical advice.
After skin contact	: Take off contaminated clothing immediately. Wash immediately with soap and water. Launder clothes before reuse.
After eye contact	: Rinse thoroughly with plenty of water. Eyelids should be held away from the eyeball to ensure thorough rinsing. Seek medical advice if irritation develops.
After swallowing	: Rinse mouth, give water to drink.

4.2 Most important symptoms and effects, both acute and delayed

Effects	: No typical effects known.
Symptoms	: No typical symptoms known.

4.3 Indication of any immediate medical attention and special treatment needed

No further relevant information available

SECTION 5: FIRE-FIGHTING MEASURES

5.1 Suitable extinguishing medium

- Suitable extinguishing agents : **Water spray, foam, carbon dioxide, dry chemical powder.**
- Inappropriate extinguishing media : **None known.**
- Notes : **Use fire extinguishing methods suitable to surrounding conditions.**

5.2 Specific hazards arise from chemical

- Warning : **Not applicable.**
- Hazardous Combustion Products : **Nitrous gasses may be produced.**
- Fire hazard : **Do not breath fumes.**
- Explosion hazard : **Do not breath fumes.**
- Reactivity : **Not specified**

5.3 Special protective action for Fire-Fighters

- Special protective actions for fire-fighters : **Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.**
- : **No action shall be taken involving any personal risk or without suitable training.**
- Special protective equipment for fire-fighters : **Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.**
- : **Clothing for fire-fighters (including helmets, protective boots, and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.**

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment, and emergency procedures

- Percussions : **No action shall be taken involving any personal risk or without suitable training.**
- Equipment : **Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.**
- Procedure : **Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Provide adequate ventilation.**

¹ PPE – Personal precautions, protective equipment.

6.2 Environmental precautions

- Environmental : **Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.**
- : **Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil, or air).**
- : **Discharge into the environment must be avoided.**

6.3 Methods and material for containment and cleaning up

- Small Spill : Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.
- Large Spill : Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements, or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.

6.4 Reference to other sections

- Section 7 : Information on safe handling.
- Section 8 : Information on personal protection equipment.
- Section 13 : For disposal information.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling

- Handling : Ensure adequate ventilation. Avoid ingestion and inhalation. Avoid dust formation. Wear protective gloves/eye protection/face protection/. Do not get in eyes, on skin, or on clothing. Wash hands thoroughly after handling.
- : For precautions see section 2.2.

7.2 Conditions for safe storage, including any incompatibilities

- Storerooms and receptacles : No specific recommendations.
- One common storage facility : Protect from moisture and wet air.
- Handling of product : Avoid dust formation. Keep container tightly closed and dry.
- Room conditions : Protect from moisture and wet air.
- Storage Class : (TRGS 510): 10 - 13 Other liquids and solids: Non-Combustible Solids

Reference: (BAUA, 2016)

7.3 Specific end use(s)

- : Apart from the uses mentioned in section 1.3 no other specific uses are stipulated

SECTION 8: EXPOSURE CONTROL AND PERSONNEL PROTECTION

8.1 Control Parameters

	Compound	Cas Number		TWA ¹	STEL ²
South African Labour Department	Fe DTPA	12389-75-2		Not Listed	Not Listed
International Labour organization (ILO)	Fe DTPA	12389-75-2		Not Listed	Not Listed
OCHA	Fe DTPA	12389-75-2		Not Listed	Not Listed

¹ TWA – Long term exposure: Time Weighted Average (8-hour period)

² STEL – Short term exposure: Short term exposure limit (15 min period)

Reference: (South African Labour Department, 2021) & (ILO, n.d.) & (OSHA, n.d.)

- Routes of exposure : **The substance can be absorbed into the body by inhalation of dust.**
- Inhalation risk : **Not Specified**
- Effects of short-term exposure : **Not Specified**
- Effects of long-term or repeated exposure : **Not Specified**

Reference: (ILO, n.d.)

8.2 Appropriate engineering controls

- : **See Section 7.**

8.2 Individual protection measures

- Eye/face protection : **Wear safety glasses.**
Use equipment for eye protection tested and approved under appropriate government standards. SABS adoption: SANS 50166:2018(SA), EN 166(EU) or NIOSH (US).
- Skin Protection : **Handle with gloves.**
Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.
- Body Protection : Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.
- Respiratory protection : **Respiratory protection only necessary if risk assessment indicates this.**
Where protection from nuisance levels of dusts is desired, use type N95 (US) or type P1 (EN 143) dust masks. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

No special environmental precautions required

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Properties

Physical state	: Solid¹
Composition	: Mono-constituent substance
Colour	: Yellow-green
Odour	: Odourless
Melting point/freezing point	: DTPA-FeHNa does not melt before the decomposition, which starts at 180°C.
Boiling point or initial boiling point and boiling range	: The end point is waived: the substance decomposes before boiling, even before melting.
Flammability	: non flammable
Lower and upper explosion limit/flammability limit	: N/A
Flash point	: The flash point is only a relevant property for liquids, thus it does not need to be measured for substances that are solids or gases at room temperature.
Auto-ignition temperature	: 332°C.
Oxidizing Properties	: Non oxidising
Decomposition temperature	: 180°C
pH	: 6-8
Kinematic viscosity	: Not applicable
Solubility	: 110 g/l water @ 20°C
Partition coefficient: n-octanol/water (log value)	: -11.9 Log Pow
Vapour pressure	: The endpoint is waived: the substance does not melt under the decomposition temperature of 180°C so the vapour pressure will be low.
Density and/or relative density	: 1.607 g/cm³ @ 20°C
Relative vapour density	: Not determined
Bulk Density (Volumetric)	: 650 - 750 kg/m³
Particle characteristics	: Fraction < 100 µm 29.0 % Fraction < 10 µm 1.9 % Fraction < 5 µm 1.0 %

Molecular Formula : C14-H18-Fe-N3-O10.H.Na

Molecular Weight : 447.18 g/mol

¹ "Solid" – Is a substance that cannot be classified as a liquid or Gas.

² "Substance" – Is chemical elements and their compounds in their natural state or obtained by production process)

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

SECTION 10: STABILITY AND REACTIVITY

Reactivity : **Not specified.**

Chemical stability : **Stable under normal conditions.**

Hazardous Reactions : **A dangerous reaction will not occur.**

Conditions to Avoid : **Avoid humidity and water.**

Incompatible Materials : **Aluminium.**

Hazardous Decomposition Products : **Not specified.**

Reference: Minema Chemicals (2022)

SECTION 11: TOXICOLOGY

11.1 Acute Toxicity

Classification : **Not classified.**

Description : **Based on the very low toxicity of Fe EDTA via the oral route, and the expected very low toxicity via the inhalation route and taking into account low dermal absorption of ADTA-compounds, no classification is needed for acute toxicity.**

Method	Compound	Cas Number	Measure	Value	Subject
Oral	Fe DTPA	12389-75-2	LD50 ¹	>2000 mg/kg bw	Rat
Inhalation	Fe DTPA	12389-75-2	LC50	>5.08 mg/L	Rat
Dermal	Fe DTPA	12389-75-2	LD50	>2000 mg/kg bw	Rat

¹ "LD50" – Lethal Doses. The dosage at which 50% mortality was observed.

² "LDLo" - The lethal dose low is the lowest dosage of a compound that is introduced to the human body or that of an animal by any means apart from inhalation that will cause the death of the individual.

³ "LC0" – The lethal concentration 0 represents the concentration at which no individuals are expected to die.

⁴ "bw" - body-weight/day

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.) & (EPA. New Zealand Government, n.d.)

11.2 Skin corrosion/irritation

Classification : **No Classification**

Description : **Very slight erythema (grade 1) was observed in one animal at 1 h after removal of the patch. There were no further skin reactions and no systemic adverse effects.**

Subject : **Rabbit**

Reference: (ECHA, n.d.)

11.3 Serious eye damage/irritation

Classification	: No Classification
Description	: Although the test item induced slight irritation, no classification is needed according to OECD-GHS.
Subject	: Rabbit

Reference: (ECHA, n.d.)

11.4 Respiratory or skin sensitisation

Classification	: No Classification
Description	: DTPA-FeNaH was considered to be a non skin sensitizer
Subject	: Mouse

Reference: (ECHA, n.d.)

11.5 Germ cell mutagenicity

Classification	: No Classification
Description	: The test substance gave negative results in two in vitro mutagenicity studies, viz. the Ames test and the micronucleus test following exposure for 4 h (with and without S9 mix) but gave positive results (aneugenicity but not clastogenicity) following exposure for 20 h (without S9 -mix). The latter was most probably explained by induction of Zn deficiency.
Subject	: Mouse

Reference: (ECHA, n.d.)

11.6 Carcinogenicity

Classification	: No Classification
Description	: EDTA-FeNa has a wide dispersive use; however, EDTA-FeNa is not classified as mutagen category 3 and there is no evidence from repeated dose studies that EDTA-FeNa is able to induce hyperplasia and/or pre-neoplastic lesions.
Subject	: N/A

Reference: (ECHA, n.d.)

11.7 Reproductive toxicity

Classification	: No Classification
Description	: Based on the results of the extended OECD 422 study (comparable to a one-generation study), viz. a decrease in sperm motility, cauda epididymis weight and in sperm reserve, as observed in male animals treated with the highest concentration of the test substance, the No Observed Adverse Effect Level (NOAEL) for fertility is 500 mg/kg body weight/day.
Subject	: N/A

Reference: (ECHA, n.d.)

11.8 STOT² - single exposure

Classification	: No data available.
----------------	----------------------

² "STOT" - Specific target organ toxicity.

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

11.9 STOT² - repeated exposure

Classification	: No Classification
Description	: Based on a NOAEL of 500 mg/kg bw in a study in which male rats were treated for at least 13 weeks and females for almost 14 weeks, no classification is needed for STOT repeated exposure.
Subject	: Rat

² "STOT" - Specific target organ toxicity.

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

11.10 Aspiration hazard

Classification	: Data conclusive but not sufficient for classification.
----------------	---

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

11.11 Route of Exposure and potential effects

Swallowing	: Not specified.
Inhalation	: Not specified.
Eye exposure	: Not specified.
Skin exposure	: Not specified.

Reference: (ECHA, n.d.)

11.12 Long- and short-term effects

No data available

Reference: (ECHA, n.d.)

SECTION 12: ECOLOGICAL INFORMATION

12.1 Toxicity

Classification	: Triggers for classification are not met.
----------------	---

Aquatic Toxicity

Compound	Cas Number	Organism	Species	Time	Measure	Value
Fe DTPA	12389-75-2	Fish	Rainbow trout	96-h	LC50 ¹	1036 mg/L
Fe DTPA	12389-75-2	Fish	Rainbow trout	28-d	NOEC ³	119 mg/L
Fe DTPA	12389-75-2	Aquatic invertebrates	Daphnia carinata	48-h	EC50	291 mg/L
Fe DTPA	12389-75-2	Aquatic invertebrates	Daphnia carinata	18-d	NOEC	59 mg/L
Fe DTPA	12389-75-2	Aquatic Algae and Cyanobacteria	Pseudokirchneriella subcapitata	72-h	EC50	9.4 mg/L
Fe DTPA	12389-75-2	Micro-organisms	Activated sludge	3-h	NOEC	>1280 mg/L

Terrestrial Toxicity

Compound	Cas Number	Organism	Species	Time	Measure	Value
Fe DTPA	12389-75-2	Macro-organisms	earthworms	unknown	EC50	217 mg/Ld
Fe DTPA	12389-75-2	Arthropods				Not Specified
Fe DTPA	12389-75-2	Plant	Unknown	21d	NOEC	117 mg/kg soil dw
Fe DTPA	12389-75-2	Micro organisms				Not Specified
Fe EDTA	15708-41-5	Birds				Not Specified

¹ "LC50 /EC50" - (Median Lethal Concentration/Median Effective Concentration) They are the concentrations at which 50% mortality or inhibition of a function (e.g., growth or growth rate) was observed.

² "NOEC" - No Observed Effect Concentration. NOEC is the highest tested concentration for which there are no statistically significant difference of effect when compared to the control group.

³ "ECx" - It is the concentrations at which x % (10% for EC10) effect was observed or derived statistically when compared to the control group.

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

12.2 Persistence and degradability

- Stability : **Hydrolysis: DTPA does not contain functional groups susceptible to hydrolysis. Therefore, the compound is hydrolytically stable in water.**
- : **Photo transformation: The estimated half-life for DTPA (acid form) in the atmosphere is 0.06 days, based on reaction with hydroxyl radicals. This is expected to be also applicable to DTPA-FeHNa.**
- Biodegradation : **EDTA (acid form) and its salts are not readily biodegradable according to OECD criteria.**

Reference: (ECHA, n.d.)

12.3 Bioaccumulate potential

- Description : **n standard biodegradation screening tests, including several ready biodegradation tests, no detectable biodegradation of DTPA was observed.**

Reference: (ECHA, n.d.)

12.4 Mobility in soil

- Adsorption : **The estimated log Koc of DTPA-FeHNa is 1 (worst case, MCI method), less than the threshold value of 3 indicating no adsorbing potential for this compound.**
- Volatilization : **Volatilization is unlikely due to the properties of the substance.**

Reference: (ECHA, n.d.)

12.5 Other adverse effects

- Classification : **No data available**

SECTION 13: DISPOSAL CONSIDERATIONS

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

SECTION 14: TRANSPORT INFORMATION

12.1 UN Modelled regulations

UN Number	:	Not regulated
UN proper shipping name	:	Not listed
Transport hazard class(es)	:	No classification
Packing group	:	No classification
Environmentally hazardous	:	No classification
Special precautions:	:	ADR/RID¹ - Not specified
		IMDG² - Not specified
		IATA³ - Not Specified
Transport in Bulk according to IMO instructions	:	Not specified

Reference: (Hazmat Tool. n.d.) & (BAM. 2021)

¹ ADR/RID - International Carriage of Dangerous Goods by Rail (RID) and by Road (ADR)

² IMDG - The International Maritime Dangerous Goods (IMDG)

³ IATA - International Air Transport Association (IATA)

SECTION 15: REGULATORY INFORMATION

15.1 Safety, Health, and environmental regulations specific for the substance or mixture

Regulations	:	This Safety Data Sheet conforms to the requirements set by the Department of Agriculture, Land reform and Rural development of the Republic of South Africa, United Nations GHS (Rev 9E) (2021) and SANS 10234:2019, on the 29 March 2022.
Restrictions	:	The substance is not subjected to any prohibitions or restriction in South Africa.
Chemical Safety Assessment:	:	For this product a chemical safety assessment was not carried out.

SECTION 16: OTHER INFORMATION

16.1 Preparation and revision

Latest Version

Version Number	: Ver. 3
Preparation Date	: 25 August 2022
Where the changes as made	: Complete overall of all data to comply with GHS regulations

Previous Version

Version Number	: Ver. 2
Preparation date	: February 2021

16.2 Abbreviations and Acronyms

GHS	: Globally Harmonized System of Classification and Labelling of Chemicals
ECHA	: European Chemical agency
AICIS	: The Australian Industrial Chemicals Introduction Scheme
EPA-NZ	: Environmental protection agency New Zealand
ILO (WHO)	: International labour organization (World health organization)
CAS Number	: CAS Number is a numerical designation for chemicals that is maintained by the Chemical Abstracts Service (CAS) of the American Chemical Society.
EC Number	: The European Community number (EC number) is a unique identifier that was assigned to substances for regulatory purposes within the European Union by the European Commission.
H-Statement	: Hazard Statement
P-Statement	: Precautionary Statements
Hazard Statements	: H319 - Causes serious eye irritation
Precautionary Statements	: P264 - Wash hands [and ...] thoroughly after handling.
	: P265 - Do not touch eyes.
	: P280 - Wear protective gloves/protective clothing/eye protection/face protection/hearing protection/...
N/A	: Not Applicable
Not Classified	: Data conclusive but not at sufficient levels for classification
PPE	: Personal precautions, protective equipment.
TWA	: Time Weighted Average
OEL	: Occupational Exposure Limits
STOT	: Specific target organ toxicity
LC50 / EC50	: (Median Lethal Concentration/Median Effective Concentration): They are the concentrations at which 50% mortality or inhibition of a function (e.g., growth or growth rate) was observed.
NOEC	: (No Observed Effect Concentration) NOEC is the highest tested concentration for which there are no statistically significant difference of effect when compared to the control group
ECx	: It is the concentrations at which x % (10% for EC10) effect was observed or derived statistically when compared to the control group
LD0	: Lethal Dose 0, represents the dose at which no individuals are expected to die.
LC0	: Lethal concentration 0, represents the concentration at which no individuals are expected to die.
LDLo	: Lethal dose low, is the lowest dosage of a compound that is introduced to the human body or that of an animal by any means apart from inhalation that will cause the death of the individual.

16.4 Disclaimer

The information contained in this SDS does not constitute a risk assessment, and should not replace the user's own assessment of risks as required by other health and safety legislation.

This SDS summarises at the date of issue our best knowledge of the health, safety and environmental hazard information related to the product and in particular how to safely handle, use, store and transport the product. Since Kynoch cannot anticipate or control the conditions under which the product may be handled, used, stored, or transported, each user must, prior to usage, review this SDS in the context of how the user intends to handle, use, store or transport the product and beyond, and communicate such information to all relevant parties.

We shall not assume any liability for the accuracy or completeness of the information contained herein or any advice given unless there has been gross negligence on our part.
