

# **KYNOCH FERTILIZER**

# **SAFETY DATA SHEET**

# MAP + 5%ZCMS

÷

Date Issued / Revised Date New version Date previously revised Replaced version 25 September 2022 3.0 1 February 2021 2.0

Prepared according to: United Nations GHS (Rev 9E) (2021) and SANS 10234:2019 (This Safety Data Sheet conforms to the requirements set by the Department of Agriculture, Land reform and Rural development of the Republic of South Africa on the 29 March 2022)

# **SECTION 1: IDENTIFICATION**

#### 1.1 GHS product identification

Product Name

MAP + 5%ZCMS

<sup>1</sup> GHS - Globally Harmonized System of Classification and Labelling of Chemicals

:

1.2 Other means of identification		
Description	Blend (N,P,K and S) made with < 10% Urea, contains Zinc oxide	
CAS Number	: <b>N/A</b>	
EC Number <sup>3</sup>	: N/A	

<sup>2</sup> "CAS Number" - CAS Number is a numerical designation for chemicals that is maintained by the Chemical Abstracts Service (CAS) of the American Chemical Society.

<sup>3</sup> "EC Number" - The European Community number (EC number) is a unique identifier that was assigned to substances for regulatory purposes within the European Union by the European Commission.

1.3 Recommended use of materials and restrictions on use		
Recommended use of material	: Intended to be used as a fertilizer and in fertilizer blends	
Description	: Source of plant nutrients	
Restrictions on use	: None Identified	

1.4 Supplier's details	
Supplier's details	: 1st Floor, ETG House
	62 Weirda Road East
	Sandton
	2196
	Tel no: (011) 317-2000

1.5 Emergency phone numb	ber	
Emergency phone number	:	Dial Triple Zero (000) and ask for fire
	:	Ambulance or the Fire department – 10177
	:	Kynoch – 086 092 7272
	:	Spilltech - 086 100 0366

# **SECTION 2: HAZARD IDENTIFICATION**

#### 2.1 Classification of substance or mixture

Product Defined

: Mixture

#### Summarized Classification

Types of Hazards	Hazard Class	Category/subcategory	H-Statement
Physical Hazards	Not Classified		
Health Hazards	Not Classified		
Environmental Hazards	Hazardous to the aquatic environment, acute hazard	Category 3	H402

#### Classification according to the United Nations GHS (Rev 9E) (2021) and SANS 10234:2019

<sup>1</sup> "Not Classified" – Data conclusive but not at sufficient levels for classification.

<sup>2</sup> "H-Statement" – Hazard Statement. Full decryption in Section16

Description	CAS Number	Classification
MAP	7722-76-1	No Classification
ZCMS		Haz. Aquatic. Cat 1

Reference: (European Chemical Agency [ECHA], n.d.) & (Environmental protection agency [EPA]. New Zealand Government, n.d.) & (The Australian Industrial Chemicals Introduction Scheme [AICIS], n.d.) & (International Labour organization [ILO], n.d.)

2.2 GHS Label elements, i	ncluding precautionary statements
Pictogram	: No Pictogram required
Pictogram Name	: No Pictogram required
Signal Word	: No signal word reguired
Hazard Statements	: H402 - Harmful to aquatic life
Precautionary Statements	: P273 - Avoid release to the environment.
Reference: (Pubchem, GHS, n.d.)	

### 2.3 Other hazards that do not result in classification

```
Hazards
```

: Can cause serous eye irritation

Reference: (European Chemical Agency [ECHA], n.d.) & (Pubchem, search, n.d.)

# **SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS**

### 3.1 Substance

Substance

: N/A

<sup>1</sup> "N/A" – Not available

Reference: (European Chemical Agency [ECHA], n.d.) & (The Australian Industrial Chemicals Introduction Scheme [AICIS], n.d.)

#### 3.2 Mixture

Substance A:	
Common name :	Mono Ammonium Phosphate
Composition :	0-80%
EC Name :	Ammonium dihydrogen orthophosphate
Chemical Formula :	(NH₄)(H₂PO4)
Molecular Weight :	115,025 g/mol
Nutrient Content :	11% N 22% P
CAS Number :	7722-76-1
EC Number :	231-764-5

# ZCMS is a trace-element mixture that is blended into the final mixture. The Substances that are identified to be hazardous in the ZCMS mixture are listed below.

#### Substance B:

Common name	: Zinc Oxide
Composition	: <2.5%
EC Name	: Zinc Oxide
Chemical Formula	: ZnO
Molecular Weight	: 81,38 g/mol
Nutrient Content	: 40% Zn
CAS Number	: 1314-13-2
EC Number	: 215-222-5

### **SECTION 4: FIRST AID MEASURES**

4.1 Description of first aid measures		
General information	: No special measures required.	
After inhalation	: Supply fresh air. Consult doctor in case of complaints.	
After skin contact	<ul> <li>Remove affected clothing. Immediately rinse with water (can use mild soap). If skin irritation continues, consult a doctor.</li> </ul>	
After eye contact	: Rinse opened eye for several minutes under running water (remove contact lenses if easily possible). Seek medical treatment.	
After swallowing	: Rinse out mouth. Make victim drink water (maximum of 2 drinking glasses). Do NOT induce vomiting. If symptoms persist consult doctor.	

#### 4.2 Most important symptoms and effects, both acute and delayed

Effects

: Not specified

### 4.3 Indication of any immediate medical attention and special treatment needed

No further relevant information available

# **SECTION 5: FIRE-FIGHTING MEASURES**

•

5.1 Suitable extinguishing medium		
Suitable extinguishing agents	:	All extinguishing media can be used.
Inappropriate extinguishing media	:	None identified
Notes	:	Use fire extinguishing methods suitable to surrounding conditions.

5.2 Specific hazards arise from chemical		
Warning	: No specific fire or explosion hazard.	
Hazardous Combustion Products	: When heated to decomposition, emits toxic fumes.	
Fire hazard	: Non-flammable substance	
Explosion hazard	: Not applicable	
Reactivity	: None	

5.3 Special protective action for Fire-Fighters				
Special protective actions for fire- fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.			
	: No action shall be taken involving any personal risk or without suitable training.			
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.			
	: Clothing for fire-fighters (including helmets, protective boots, and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.			

# SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment, and emergency procedures			
Percussions	: No action shall be taken involving any personal risk or without suitable training.		
Equipment	: Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.		
Procedure	: Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Provide adequate ventilation.		

<sup>1</sup> PPE – Personal precautions, protective equipment.

6.2 Environmental precautio	ns	
Environmental	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
:		Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil, or air).
	:	Discharge into the environment must be avoided.

Small Spill	aterial for containment and cleaning up <ul> <li>Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste</li> </ul>
	disposal contractor.
Large Spill	: Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements, or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.
6.4 Reference to ot	ner sections

	10	
Section 7	:	Information on safe handling.
Section 8	:	Information on personal protection equipment.
Section 13	:	For disposal information.

# **SECTION 7: HANDLING AND STORAGE**

7.1 Precautions for safe handling					
Handling	: Ensure adequate ventilation. Avoid ingestion and inhalation. Avoid dust formation. Wear protective gloves/eye protection/face protection/. Do not get in eyes, on skin, or on clothing. Wash hands thoroughly after handling.				
Handling	: Further processing of solid materials may result in the formation of combustible dusts. The potential for combustible dust formation should be taken into consideration before additional processing occurs. Provide appropriate exhaust ventilation at places where dust is formed.				
	: For precautions see section 2.2.				
7.2 Conditions for safe stora	ge, including any incompatibilities				
Storerooms and receptacles	: No special requirements.				
One common storage facility	: Separated from strong bases.				
Handling of product	: Not Specified				
Room conditions	: Store in the closed, original container.				
	: Store in dry, cool area.				
Storage Class	: Store at 15 to 30 °C				

Storage Class Reference: (BAUA, 2016)

7.3 Specific end use(s)

Specific end use(s)

: Apart from the uses mentioned in section 1.3 no other specific uses are stipulated

# **SECTION 8: EXPOSURE CONTROL AND PERSONNEL PROTECTION**

#### 8.1 Control Parameters

•

	Compound	Cas Number	TWA <sup>1</sup>	<b>STEL</b> <sup>2</sup>
OCHA	MAP	7722-76-1	Not Listed	Not Listed

<sup>1</sup> TWA – Long term exposure: Time Weighted Average (8-hour period) <sup>2</sup> STEL – Short term exposure: Short term exposure limit (15 min period)

Reference: (South African Labour Department, 2021) & (ILO, n.d.) & (OSHA, n.d.)

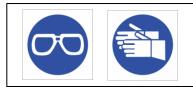

Routes of exposure	:	The substance can be absorbed into the body by inhalation of its aerosol and by ingestion.
Inhalation risk	:	Evaporation at 20°C is negligible; a nuisance-causing concentration of airborne particles can, however, be reached quickly, especially if powdered.
Effects of short-term exposure	:	Contact can irritate the skin and eyes
Effects of long-term or repeated exposure	:	Repeated exposure to ammonia may cause chronic irritation of the respiratory tract.
Reference: (ILO, n.d.)		

8.2 Appropriate engineering controls				
	Ensure adequate ventilation, especially in confined areas. Ensure that eyewash stations, and safety showers are close to the workstation location.			
	See Section7.			
8.2 Individual protection meas	ures			
Eye/face protection	<ul> <li>Wear safety glasses.</li> <li>Use equipment for eye protection tested and approved under appropriate government standards. SABS adoption: SANS 50166:2018(SA), EN 166(EU) or NIOSH (US).</li> </ul>			
Skin Protection	<ul> <li>Handle with gloves.</li> <li>Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product.</li> <li>Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.</li> </ul>			
Body Protection	Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.			
Respiratory protection	<b>Not required under normal conditions of use.</b> Where protection from nuisance levels of dusts is desired, use type N95 (US) or type P1 (EN 143) dust masks. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).			

Control of environmental exposure

•

: No special environmental precautions required

# **SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES**

Physical state	:	Solid <sup>1</sup>
Composition	:	Mixture <sup>2</sup>
Colour	:	Colourless / White to brown, red and black
Odour	:	Odourless
Melting point/freezing point	:	133-134 °C
Boiling point or initial boiling point and boiling range	:	Decomposes
Flammability	:	Product is not flammable
Lower and upper explosion limit/flammability limit	:	Not determined
Flash point	:	Not applicable
Auto-ignition temperature	:	Not determined
Oxidizing Properties	:	Non oxidizer
Decomposition temperature	:	≥150 °C
рН	:	Not Available
Kinematic viscosity	:	N/A
Solubility	:	N/A
Partition coefficient: n-octanol/water (log value)	:	N/A
Vapour pressure	:	N/A
Density and/or relative density	:	N/A
Relative vapour density	:	N/A
Bulk Density (Volumetric)	:	N/A
Particle characteristics	:	between 0.1 - 5mm
Molecular Formula	:	N/A
Molecular Weight	:	N/A

"Solid" – Is a substance that cannot be classified as a liquid or Gas.
 "Substance" – Is chemical elements and their compounds in their natural state or obtained by production process)

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

# **SECTION 10: STABILITY AND REACTIVITY**

Reactivity	:	None known, based on information available
Chemical stability	:	Stable under normal conditions
Hazardous Reactions	:	None under normal processing
Conditions to Avoid	:	Incompatible products
Incompatible Materials	:	Urea: strong oxidizing agents, Chlorine, sodium hypochlorite MAP: Magnesium, Strong acids, bases. KCI: Strong acids and strong oxidizing agents ZnO: Acids; Bases
Hazardous Decomposition Products	:	Urea: Products Nitrogen oxides (NOx), Carbon monoxide (CO), Carbon dioxide (CO2), Ammonia MAP: Toxic fumes: Ammonia KCI: Potassium oxides and chlorine gas ZnO: ZnO-fume can be generated during thermal processing.

## **SECTION 11: TOXICOLOGY**

11 1	<b>Acute Toxicity</b>	
	Acute IOXICITY	

•

- Classification
- Description

- : No Classification
- : No Substance is classified for Acute toxicity

#### Substance A:

Method	Compound	Cas Number	Measure	Value	Subject
Oral	MAP	7722-76-1	LD50 <sup>1</sup>	>2000 mg/kg bw <sup>2</sup>	Rat
Inhalation	MAP	7722-76-1	LC50	>5 mg/L	Rat
Dermal	MAP	7722-76-1	LD50	>5000 mg/kg bw	Rat

#### Substance B:

Method	Compound	Cas Number	Measure	Value	Subject
Oral	Zinc Oxide	1314-13-2	LD50 <sup>1</sup>	>5000 mg/kg bw <sup>2</sup>	Rat
Inhalation	Zinc Oxide	1314-13-2	LC50	>5.7 mg/L	Rat
Dermal	Zinc Oxide	1314-13-2	LD50	>2000 mg/kg bw	Rat

<sup>1</sup> "LD50" – Lethal Doses. The dosage at which 50% mortality was observed.

<sup>2</sup> "bw" - body-weight/day

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.) & (EPA. New Zealand Government, n.d.)

	1.2 Skin corrosion/irritation		
(	Classification	:	No classification
[	Description	:	None of the component was classified as skin corrosive/irritant.
Ś	Subjects	:	Humans, Rabbits
R	eference (FCHA n.d.) & (Pubchem se	an	ch nd)

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

11.3 Serious eye damage/irritation				
Classification	: No Classification			
Description	: MAP and Ammonium Sulphate is not irritating. The amount in the final mixture too little to warrant a classification according to the GHS guidelines.			
Subjects	: Humans, Rabbits			
Reference: (ECHA, n.d.)	& (EPA. New Zealand Government, n.d.) & (Pubchem, search, n.d.)			
11.4 Respiratory	or skin sensitisation			
Classification	: No classification			

Description

: None of the component was classified as skin corrosive/irritant.

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

11.5 Germ cell mutagenicity

- : No classification
- : None of the component was classified as skin corrosive/irritant.

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

11.6 Carcinogenicity		
	: No classification	

- : None of the component was classified as skin corrosive/irritant.
- : Rat and Mouse

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

11.7 Reproductive toxicity	
Classification	: Not Classified
Description	: None of the component was classified for reproductive toxicity.
Subject	: Rat
Reference: (ECHA, n.d.) & (Pubchem, s	earch, n.d.)

### 11.8 STOT<sup>2</sup> - single exposure

<sup>2</sup> "STOT" - Specific target organ toxicity.

No data available

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

### 11.9 STOT<sup>2</sup> - repeated exposure

No data available

<sup>2</sup> "STOT" - Specific target organ toxicity. Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

### No data available

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

11.11 Route of Exposure and potential effects
---

: Convulsions. Headache. Nausea. Vomiting.

Inhalation Eye exposure

Skin exposure

: Cough. Shortness of breath. Sore throat

: Redness

: Redness

2

Reference: (ECHA, n.d.) & (Pubchem, search, n.d. / Referencing ILO)

### 11.12 Long- and short-term effects

No data available

Reference: (ECHA, n.d.)

### **SECTION 12: ECOLOGICAL INFORMATION**

### 12.1 Toxicity

Classification

: Hazardous to the aquatic environment, acute hazard, Cat 3

Zinc Oxide is classified as (H400 + H410) Hazardous to the aquatic environment, long-term hazard, Category 1, Class 9

# Aquatic Toxicity

Substance A:						
Compound	Cas Number	Organism	Species	Time	Measure	Value
MAP	7722-76-1	Fish	Rainbow trout	96-h	LC50 <sub>1</sub>	>100 mg/L
MAP	7722-76-1	Aquatic invertebrates	Daphnia Carinata	48-h	EC50 <sub>1</sub>	>100 mg/L
MAP	7722-76-1	Aquatic Algae and Cyanobacteria	Desmodesmus Subscpicatus	72-h	EC50 <sub>1</sub>	>100 mg/L
MAP	7722-76-1	Micro-organisms	Activated sludge of a predominantly domestic sewage	3-h	EC50	>100 mg/L

#### Substance B:

Cubstance D.		1				
Compound	Cas Number	Organism	Species	Time	Measure	Value
Zinc Oxide	1314-13-2	Fish	Oncorrhynchus Mykiss	96-h	LC50 <sup>1</sup>	0.169 mg/L
Zinc Oxide	1314-13-2	Fish	Unknown	Unknown	NOEC <sup>3</sup>	0.044 mg/L
Zinc Oxide	1314-13-2	Aquatic invertebrates	Daphnia magna	24-h	EC50 <sup>1</sup>	660 mg/L
Zinc Oxide	1314-13-2	Aquatic invertebrates	Daphnia magna	21-d	EC10 <sup>3</sup>	N/A
Zinc Oxide	1314-13-2	Aquatic Algae and Cyanobacteria	Scenedesmus subspicatus	72-h	EC10 <sup>3</sup>	100 mg/L
Zinc Oxide	1314-13-2	Microorganisms	-	3-h	EC50 <sup>1</sup>	1000 mg/L

#### **Terrestrial Toxicity**

•

#### Substance B:

Compound	Cas Number	Organism	Species	Time	Measure	Value
Zinc Oxide	1314-13-2	Micro-organisms	6 Different Species	Unknown	NOEC <sup>2</sup>	35.7-1634 mg/kg dw
Zinc Oxide	1314-13-2	Anthropoids	2 Different Species	Unknown		14.6-1000 mg/kg dw
Zinc Oxide	1314-13-2	Terrestrial plants	18 Different Species	Unknown	NOEC <sup>3</sup>	32-5855 mg/kg dw
Zinc Oxide	1314-13-2	Micro-organisms	Unknown	Unknown	NOEC	17-2623 mg/kg dw
Zinc Oxide	1314-13-2	Birds				Not Relevent

Terrestrial toxicity was not warranted on MAP and KCI.

:

<sup>1</sup> "LC50 /EC50" - (Median Lethal Concentration/Median Effective Concentration) They are the concentrations at which 50% mortality or inhibition of a function (e.g., growth or growth rate) was observed.
 <sup>2</sup> "NOEC" - No Observed Effect Concentration. NOEC is the highest tested concentration for which there are no statistically significant difference of effect

when compared to the control group.

<sup>3</sup> "ECx" - It is the concentrations at which x % (10% for EC10) effect was observed or derived statistically when compared to the control group.

Reference: (ECHA, n.d.) & (Pubchem, search, n.d.)

12.2 Persistence and degradability			
Stability	: None of the components hydrolyse nor is there evidence for photodegradation.		
Biodegradation	Readily biodegradation study does not need to be conducted since the substance is inorganic.		
Reference: (ECHA, n.d.)			

12.3 Bioaccumulate potentia		
Description	:	The study does not need to be conducted as the substance as an inorganic salt has a low potential for adsorption.
Reference: (ECHA, n.d.)		

12.4 Mobility in soil	
Adsorption	<ul> <li>Simple inorganic salts with high aqueous solubility will exist in a dissociated form in an aqueous solution. Such a substance has a low potential for adsorption.</li> </ul>
Volatilization Reference: (ECHA, n.d.)	: No data available

12.5 Other adverse effects	
Classification	: No data available

### **SECTION 13: DISPOSAL CONSIDERATIONS**

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### **SECTION 14: TRANSPORT INFORMATION**

#### 12.1 UN Modelled regulations

UN Number	:	No classification
UN proper shipping name	:	No classification
Transport hazard class(es)	:	No classification
Label	:	No classification
Packing group	:	No classification
Environmentally hazardous	:	No classification
Special precautions:	:	ADR/RID - Not classified
		IMDG <sup>2</sup> - Not classified
		IATA <sup>3</sup> - Not classified
Transport in Bulk according to IMO	:	Not specified

instructions

Reference: (Hazmat Tool. n.d.) & (BAM. 2021)

<sup>1</sup> ADR/RID - International Carriage of Dangerous Goods by Rail (RID) and by Road (ADR)

<sup>2</sup> IMDG - The International Maritime Dangerous Goods (IMDG)

<sup>3</sup> IATA - International Air Transport Association (IATA)

### **SECTION 15: REGULATORY INFORMATION**

15.1 Safety, Health, and environmental regulations specific for the substance or mixture			
Regulations	:	This Safety Data Sheet conforms to the requirements set by the Department of Agriculture, Land reform and Rural development of the Republic of South Africa, United Nations GHS (Rev 9E) (2021) and SANS 10234:2019, on the 29 March 2022.	
Restrictions	:	The substance is not subjected to any prohibitions or restriction in South Africa.	
Chemical Safety Assessment:	:	For this product a chemical safety assessment was not carried out.	

### **SECTION 16: OTHER INFORMATION**

16.1 Preparation and revision	on	
Latest Version		
Version Number	:	Ver. 3
Preparation Date	:	25 August 2022
Where the changes as made	:	Complete overall of all data to comply with GHS regulations
Previous Version		
Version Number	:	Ver. 2
Preparation date	:	February 2021

16.2 Abbreviations and Acronyms		
GHS	: Globally Harmonized System of Classification and Labelling of Chemicals	
ECHA	European Chemical agency	
AICIS	The Australian Industrial Chemicals Introduction Scheme	
EPA-NZ	: Environmental protection agency New Zealand	
ILO (WHO)	International labour organization (World health organization)	
CAS Number	: CAS Number is a numerical designation for chemicals that is maintained by the Chemical Abstracts Service (CAS) of the American Chemical Society.	
EC Number	The European Community number (EC number) is a unique identifier that was assigned to	
	substances for regulatory purposes within the European Union by the European Commission.	
H-Statement	Hazard Statement	
P-Statement	Precautionary Statements	
Hazard Statements	H319 - Causes serious eye irritation	
Precautionary Statements	P264 - Wash hands [and] thoroughly after handling.	
	P265 - Do not touch eyes.	
	: P280 - Wear protective gloves/protective clothing/eye protection/face protection/hearing protection/	
N/A	: Not Applicable	
Not Classified	: Data conclusive but not at sufficient levels for classification	
PPE	: Personal precautions, protective equipment.	
TWA	: Time Weighted Average	
OEL	: Occupational Exposure Limits	
STOT	: Specific target organ toxicity	
LC50 / EC50	: (Median Lethal Concentration/Median Effective Concentration): They are the concentrations at which	
NOFO	50% mortality or inhibition of a function (e.g., growth or growth rate) was observed.	
NOEC	: (No Observed Effect Concentration) NOEC is the highest tested concentration for which there are no statistically significant difference of effect when compared to the control group	
ECx	It is the concentrations at which x % (10% for EC10) effect was observed or derived statistically when	
	compared to the control group	
LDO	: Lethal Dose 0, represents the dose at which no individuals are expected to die.	
LC0	Lethal concentration 0, represents the concentration at which no individuals are expected to die.	
LDLo	Lethal dose low, is the lowest dosage of a compound that is introduced to the human body or that of	
	an animal by any means apart from inhalation that will cause the death of the individual.

#### **16.4 Disclaimer**

•

The information contained in this SDS does not constitute a risk assessment, and should not replace the user's own assessment of risks as required by other health and safety legislation.

This SDS summarises at the date of issue our best knowledge of the health, safety and environmental hazard information related to the product and in particular how to safely handle, use, store and transport the product. Since Kynoch cannot anticipate or control the conditions under which the product may be handled, used, stored, or transported, each user must, prior to usage, review this SDS in the context of how the user intends to handle, use, store or transport the product and beyond, and communicate such information to all relevant parties.

We shall not assume any liability for the accuracy or completeness of the information contained herein or any advice given unless there has been gross negligence on our part.
